

UK Analytics – Navigating Net Zero: Data-Driven Solutions

Join us for an insightful session on how UK Analytics is helping Welsh businesses achieve Net Zero through expert consultancy and data-driven solutions for carbon accounting, reporting, and reduction strategies. Learn how international standards like ISO 14064-1 are being used to help organisations accurately measure their environmental impact, identify key emission sources, and develop tailored decarbonisation plans, that include Digital Twin technology for the built environment.

Guest Speaker: Huw Williams

Speaker: David James

Full details can be found on the website.
