Waterproofing Solutions - above and below ground

Beton Bauen is able to offer *Polyurea* or *MMA* spray applied waterproofing membrane solutions, eliminating potential weaknesses often associated with other waterproofing systems. These materials have the ability to bond to virtually any surface and are able to transcend multiple substrates. The cold-process fluid spray is often quicker and safer than more traditional membrane solutions, yet offers the elastic properties of modern polymers combined with the waterproof characteristics of a highly amalgamated asphalt. This technology results in a seamless waterproof membrane that is an 'instant set' application, saving time and money. Commercial solutions often include (but are not limited to):

- ▶ PODIUM DECKS & TERRACES
- ▶ BRIDGE DECKS
- ▶ WATER STORAGE
- ▶ CAR PARKS
- ▶ BURIED & EXPOSED ROOFS
- ▶ TUNNEL LININGS
- ▶ TANK LININGS
- ▶ RETAINING WALLS
