

SMR UK – Sustainable Materials, The Smart Alternative

Join us for an insightful session on how SMR UK offer innovative and sustainable binder solutions for the construction, civil engineering, and utilities sectors.

Headquartered in South Wales, SMR UK is pioneering the next generation of binder technologies for construction, civil engineering and environmental remediation. Their proprietary binders transform how industries approach backfill, soil stabilisation and remediation, offering innovative solutions that divert waste from landfill, eliminate the need for imported aggregates, and deliver significant carbon and cost savings.
