ABOUT US: BETON BAUEN HISTORY

Over 300+ years combined experience Specialist Contracting in the United Kingdom and overseas.

Beton Bauen Limited is an independent, family business, led by Managing Director, Steve Davies. Founded in 2006, the company has grown considerably and is now regarded as a leading specialist in Concrete Repair, Structural Waterproofing and Ground Gas Protection within the United Kingdom and overseas. We work extensively in the field of highways and road infrastructure, as well as specialist works including sea and flood defences.

Originally established in Newport (South Wales), our head office relocated in 2014 to larger, dedicated premises in Caerphilly, with convenient transport access to the M4 'corridor'. The bulk of our contract work is located within the South West of England and South Wales areas, for large organisations from various private sectors such as *Engie, Welsh Water, Skanska, RWE* and *TATA Steel Europe*, plus a number of local authority councils and public sector organisations like the *DVLA, NHS* and *Cardiff City Council*.

Beton Bauen has been involved with major projects further afield, including South East Asia and more recently supporting oil and gas industries in the southern states of the USA. We have also completed projects in Ireland, continental Europe, the Middle East and Africa, gaining extensive experience of working in some of the most challenging and difficult environments.

Beton Bauen provides a dedicated and reliable service, combined with exceptional customer care. We plan and manage operations professionally, whether a long-term construction project or an emergency repair. The business continues to enjoy rapid growth and expansion, due largely to repeat business and regular contracts from a large number of loyal and satisfied commercial clients.

Beton Bauen Limited is led by Managing Director, Steve Davies. Steve has extensive knowledge of the industry and over the last 30-years has successfully completed Structural Waterproofing projects across the globe. The business employs a highly skilled, qualified, and experienced team of over thirty, that can be relied upon to deliver solutions on time, to a high standard.

For career opportunities visit WWW.BETONBAUEN.COM

OUR SECTORS

Beton Bauen delivers services to a diverse number of clients in multiple sectors including the Construction, Engineering, Water Treatment and Power industries.

Beton Bauen offer bespoke constructive solutions and technical support across a broad spectrum of market sectors, including some of the most demanding industrial environments.

Our clients include Local Authorities, National Contractors, Architects, Facilities Managers, and Structural Engineers.

An accredited SSIP member, Beton Bauen Limited is certified to ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 to ensure the highest of standards in our commitment to delivering quality, safety, and management of our environmental responsibilities.

- ▶ CIVIL & STRUCTURAL ENGINEERING
- ▶ POWER INDUSTRY
- ▶ UTILITY PROVIDERS
- ▶ WATER TREATMENT INDUSTRY
- ▶ LOCAL AUTHORITIES
- ▶ TRANSPORT & INFRASTRUCTURE PROVIDERS
- ▶ DOMESTIC & COMMERCIAL PROPERTY DEVELOPERS
- ▶ STRUCTURAL DEVELOPERS
- ▶ TOWN PLANNERS
- ▶ ARCHITECTS
- ▶ CHARTERED SURVEYING
- ▶ GROUNDWORK SPECIALISTS
- ▶ CHEMICAL SPECIALISTS

Find out more at WWW.BETONBAUEN.COM/OUR-CLIENTS

OUR CLIENTS

Beton Bauen delivers services to a number of well-known clients in the private and public sector within the United Kingdom and overseas.

Beton Bauen operates throughout the United Kingdom and overseas to a number of established clients, in the private and public sector.

Notable clients include:

- ▶ ENGIE
- ▶ TATA
- ▶ SKANSKA
- ▶ DRIVING & VEHICLE LICENSING AGENCY (DVLA)
- ▶ NATIONAL HEALTH SERVICE (NHS)
- ▶ CBRE
- ▶ WELSH WATER
- ▶ WESSEX WATER
- ▶ RWE
- ▶ CARDIFF CITY COUNCIL
- ▶ VALE OF GLAMORGAN COUNCIL
- ▶ RHONDDA CYNON TAF COUNCIL
- ▶ BRISTOL CITY COUNCIL

For client testimonials please email us ENQUIRIES@BETONBAUEN.COM

OUR SERVICES

CONCRETE SPECIALIST SOLUTION PROVIDERS

We have the knowledge and experience to deliver projects, large or small.

Beton Bauen deliver a comprehensive range of services relating to Structural Waterproofing and Concrete Repair, Refurbishment & Protection within the United Kingdom and overseas. With over 300+ years' combined experience in the industry, our management and fully trained staff have the knowledge and experience to deliver projects, large or small. Beton Bauen strive to deliver projects on time, whilst maintaining value and efficiency. Our core services include (but are not limited to):

- ▶ CONCRETE REPAIR & PROTECTION
- ▶ LEAK SEALING & STRUCTURAL INJECTION
- ▶ CONFINED SPACE WORKING
- ▶ SITE SURVEYS & CONCRETE TESTING
- ▶ INTRUSIVE & NON-INTRUSIVE SITE INVESTIGATIONS
- ▶ PROTECTIVE WATERPROOF COATINGS
- ▶ TANKING SYSTEMS
- ▶ STRUCTURAL & SPRAYED MEMBRANES
- ▶ COMPOSITE STRENGTHENING
- ▶ MASONRY STABILISATION
- ▶ GROUND GAS PROTECTION
- ▶ SURFACE PREPARATION
- ▶ SPECIALIST GROUTING
- ▶ FACADE CLEANING & PROTECTION
- ▶ DIAMOND DRILLING
- ▶ INDUSTRIAL FLOORING & REFURBISHMENT

Find out more at WWW.BETONBAUEN.COM

OUR SERVICES: BETON BAUEN CORE SOLUTIONS

STRUCTURAL WATERPROOFING

Beton Bauen specialises in a wide range of structural waterproofing solutions, both locally and on a national level including Structural & Sprayed Membranes, Remedial Waterproofing, Structural Grouting, Surface Preparation, Resin Injection & Structural Water Stopping and Sprayed Concrete.

CONCRETE REPAIR & CATHODIC PROTECTION

Beton Bauen UK deliver a wide range of structural concrete repair, protection and strengthening projects throughout the United Kingdom and beyond. In addition, we offer emergency services for this specialist construction sector within Wales and the South West of England.

SITE SURVEYS & CONCRETE TESTING

Beton Bauen has a wealth of experience in the field application of structural investigations, condition surveys and concrete testing. In addition, we offer Aerial Surveys (using the latest drone technology), providing a safe and efficient solution to challenging or restrictive environments.

#01 CONCRETE REPAIR & CATHODIC PROTECTION

Concrete must be maintained and protected against deterioration caused by the environment that it is placed in. Typical causes of concrete deterioration include atmospheric pollutants, chloride induced corrosion of reinforcing steel and general failure due to poor quality and chemical attack.

Beton Bauen has full membership with the Concrete Repair Association (CRA) and the Concrete Society. To obtain membership status (as part of the application) the contractor must demonstrate their competency through substantiated project references, qualification of compulsory ISO standards, and conformity to the CRA's code of practice.

With the implementation of such standards and procedures, engineers, consultants, local authorities, and other specifiers have assurance in knowing that they will be partnering with an established, professional organisation.

Essential Concrete Repair & Protection services available from Beton Bauen include (but not limited to)

- ▶ Concrete Inspection & Testing
- ▶ Concrete Repair
- ▶ Sprayed Concrete/Grouting
- ▶ Cathodic Protection
- ▶ Composite Strengthening
- ▶ Protective Coatings
- ▶ Crack Injection Grouting

#02 LEAK SEALING & STRUCTURAL INJECTION

Our Leak Sealing specialists are highly experienced in the field application of structural and water-stopping resin injection. With a proven track record above and below ground, we can provide practical solutions for the most challenging of environments. Our teams have built up a wealth of experience in the following settings:

- ▶ Culverts
- ▶ Water Treatment Works
- ▶ Reservoir Dams
- ▶ Clean & Dirty Water Sites
- ▶ Commercial Substructure
- ▶ Storm Tanks
- ▶ Service Tunnels
- ▶ Powerplants
- ▶ Manhole Covers
- ▶ Pumping Stations

#03 SITE SURVEYS & CONCRETE TESTING

Beton Bauen has a wealth of experience in the field application of structural investigations, condition surveys and concrete testing. Using the latest technology, current standards, and in partnership with a UKAS accredited laboratory, we are able to offer the following tests to suit your requirements:

- ▶ Half Cell Electrical Potential Testing
- ▶ Cover Meter Testing
- ▶ Ultrasonic Pulse Velocity Testing (UPV)
- ▶ Core Sample/Compressive Strength
- ▶ Schmidt Hammer or Rebound Hammer Tests
- ▶ Chloride Testing (Dust)
- ▶ High Alumina Cement Content
- ▶ Carbonation
- ▶ Intrusive Testing
- ▶ Non-Intrusive Testing

For more information about our services and specific works, please visit our website WWW.BETONBAUEN.COM

WATERPROOFING DELIVERING SOLUTIONS IN EXTREME CONDITIONS

Aside from everyday delivery of waterproofing solutions for bridges and buildings, we often deliver waterproofing solutions in the most extreme conditions.

Beton Bauen often undertake waterproofing projects on sea defences, piers and jetty but back in 2010 completed a unique project at Spitbank Fort, Southsea, including a helipad! The sea fort was built as one of four, as a result of the 1859 Royal Commission in order to help defend a mainland invasion by France. Located in the Solent (near Portsmouth), Spitbank Fort has been a luxury hotel since 2011 and more recently featured on BBC News since becoming available for purchase.

For more information visit WWW.SOLENTFORTS.COM

Spitbank Fort, Southsea (Portsmouth)

#04 INTRUSIVE & NON-INTRUSIVE SITE INVESTIGATIONS

Beton Bauen is able to provide intrusive and non-intrusive surveys on reinforced and mass concrete, brick and associated materials that may be affected by water penetration, subsidence, fire damage, etc. We can assess the condition and deterioration of structural concrete and then the structures' suitability for repair or reconstruction.

Our highly skilled engineers provide comprehensive investigation techniques using the latest specialist equipment and techniques. Investigation and testing services include (but not limited to):

- ▶ Schmidt Hammer Testing
- ▶ Half Cell Potential Concrete Testing
- ▶ Leak Detection & Moisture Mapping
- ▶ Concrete and Masonry Diamond Drilling
- ▶ Full UKAS Laboratory Testing
- ▶ Alkali-Silica Reaction (ASR) Testing
- ▶ Comprehensive and Tensile Strengths
- ▶ Routine Concrete Testing (BA 35/90)
- ▶ Integrity & Dry Testing, Leak Detection
- ▶ Concrete & Grout Chloride Ion Testing
- ▶ Cathodic Protection Works (CP)
- ▶ Content Tests (Sulphates, Carbonation, etc.)
- ▶ HAC (High Alumina Cement) Testing

#05 CONFINED SPACE WORKS

Confined spaces are usually not designed for people to work in. This specialist service is often defined as dangerous or hazardous work with unfamiliar challenges such as access difficulties, explosive or toxic gases, low oxygen levels, extreme temperatures, and most commonly the risk of leaking water. Fortunately, Beton Bauen are experienced confined space contractors. As Confined Space Entry Specialists, we recognise how effective training is paramount for our workforce and the management of health and safety in our company.

Our organisation has fully trained and highly skilled operatives with vast experience, gathered from years of specialist projects, in particular working within the UK water industry and power sectors. Through our rolling training programme,SSIP and ISO accreditations, you can rest assured that all works are completed safely and in line with the current regulations and Approved Codes of Practice.

Beton Bauen provides a comprehensive range of confined space works including repairs, testing, application, inspections, cleaning, and leak detection. Confined spaces where we might be able to help include (but are not limited to):

- ▶ Man Holes
- ▶ Tunnels & Shafts
- ▶ Underground Sewers
- ▶ Pits, Pipes & Ducts
- ▶ Silos
- ▶ Wet or Dry Wells
- ▶ Flues & Chimneys
- ▶ Pre-Cast Concrete Chambers

#06 WATERPROOFING & TANKING SYSTEMS

In partnership with leading manufacturers, Beton Bauen provide waterproofing solutions for both new and existing build projects within the construction industry. Our project portfolio ranges from domestic projects, high-end residential properties, to commercial buildings and civil/marine infrastructure.

We specialise in waterproofing and tanking solutions for flat roofing, refurbishment, housing development, highways infrastructure and the water industry. Our services include:

- ▶ Polymer-Modified Coatings
- ▶ MMA Coatings
- ▶ Epoxy Wall & Floor Coatings
- ▶ Liquid Applied Coatings
- ▶ Cavity Drainage Systems
- ▶ Polyurethane Coatings
- ▶ Cementitious Tanking
- ▶ Sheet Membranes
- ▶ Spray Applied Coatings
- ▶ Silane Treatments

#07 SPRAY APPLIED WATERPROOFING

Beton Bauen provides innovative waterproofing solutions for both new and existing build projects within the construction and maritime industries. Our portfolio ranges from domestic projects, high-end residential properties, to commercial buildings and civil/marine infrastructure.

We specialise in sprayed waterproofing solutions for flat roofing, refurbishment, residential housing developments, highways infrastructure and the water industry.

We provide 'fast track' spray applied waterproof systems, cement and resin-based materials with the benefit of extremely fast curing times applied over large areas, including:

Sprayed Waterproofing Systems

- ▶ Polymer-Modified Cement Based
- ▶ MMA Coatings (BBA Certification)
- ▶ Epoxy Wall & Floor Coatings
- ▶ Sheet Membranes
- ▶ Cementitious Tanking
- ▶ DWI Dermabit Coatings
- ▶ Polyurethane Coatings
- ▶ Cavity Drainage Systems
- ▶ Silane Treatments

Ideal Solutions For...

- ▶ Bridge Decks/Structures
- ▶ Bunds & Sulphur Pits
- ▶ Water Treatment Tanks
- ▶ Podium Decks

#08 SPECIALIST GROUTING

Non-shrink high-flow cementitious grouts formulated from special cements and well graded aggregates are used as standard by Beton Bauen. Most commonly this specialist material is used for precision anchoring of machinery and metallic structures. When mixed with water the formulated substance is transformed into a dense fluid grout, without segregation, able to fill intricate spaces. These specialist grouts also have the following qualities:

- ▶ Excellent impermeability to water
- ▶ Excellent adhesion to iron and concrete
- ▶ Excellent resistance to dynamic/mechanical stress
- ▶ Modulus of elasticity & thermal expansion coefficient (similar to high quality concrete)

#09 SPRAYED CONCRETE

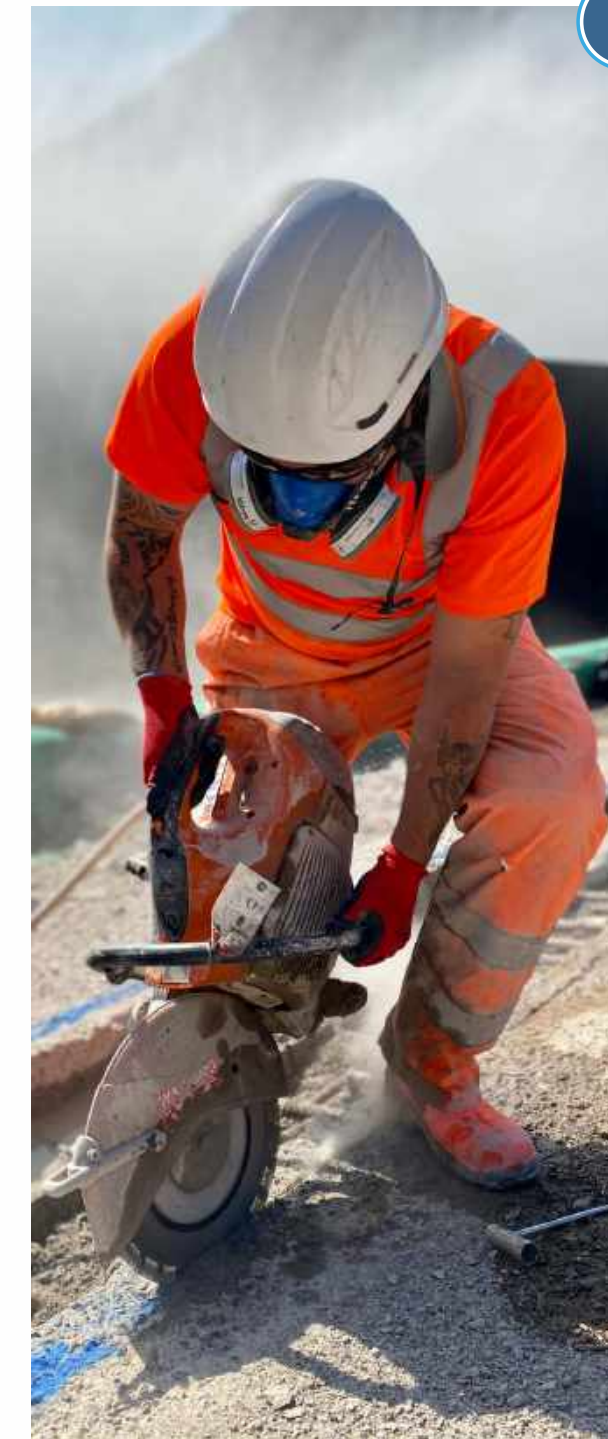

Sprayed concrete (sometimes referred to as Shotcrete) is the method by which concrete is sprayed into place, rather than the more conventional pouring method. Applications for sprayed concrete include curved structures (inc. shell roofs and domes & tunnel linings) and free-formed structures. Applications also include underground construction, retaining walls, piled wall facings, fire protection to steelwork, and strengthening and repair works to existing structures. Beton Bauen can offer full technical support in material specification and its practical application, with experienced spray crews and equipment available for sub-contracting works across the UK.

- ▶ Excellent waterproofing properties
- ▶ Suitable for marine environments
- ▶ Can be applied to damp substrate
- ▶ Resists weathering and freeze/thaw cycles
- ▶ Allows substrate to breath

#10 INDUSTRIAL FLOORING

Beton Bauen is a leading resin flooring installer. In addition, we specialise in concrete slab and screed repairs, with 'fast track' material solutions available for both cement and resin based floors. We offer a wide range of repair and maintenance services for the sector including patch and/or crack repairs, re-bonding of delaminated screeds, joint Arris repairs, void filling (below slabs) and Epoxy resin injection; uniquely we can operate a dust management policy (whilst working inside occupied buildings). Systems can include:

- ▶ Polymer modified repair systems
- ▶ Epoxy coating & toppings
- ▶ Polyurethane coating & toppings
- ▶ Pumped screeds
- ▶ Epoxy repair systems
- ▶ Expansion joint replacement

#11 FAÇADE CLEANING & PROTECTION

Beton Bauen offers a range of high-pressure water cleaning and restoration solutions to help restore a building's original features. We can apply a 'Deep Clean' to a building façade, plus provide protective coatings to help maintain and protect concrete, masonry, and stone façades.

Our experience and knowledge of external façade cleaning and restoration means there is very little that we haven't dealt with before. We can assess the type and scale of damage or deterioration and provide you with advice and guidance on the most appropriate solutions. Systems can include:

- ▶ High rise buildings with cradle or MWEP access
- ▶ Steam cleaning for improved results
- ▶ Protective coatings following cleaning (for long-term protection)
- ▶ Grit blasting combination
- ▶ Deep clean of external areas

#12 GROUND GAS PROTECTION

Beton Bauen is one of the UK's leading ground gas membrane installers. We also offer a full detail design service in addition to supply and installation. Beton Bauen supplies gas proof / gas resistant membranes, in order to provide additional protection to structures and buildings from potentially harmful ground gases, such as Radon, CO₂, Methane, VOCs (Volatile Organic Compounds) and Hydrocarbons. Before construction work takes place on any new or existing development, areas identified as being high in radon, or other harmful gases, will need suitable protection measures. Gas protection is a technical solution to prevent or to control gas penetration into properties and structures. Gas protection systems are critical in projects constructed on land affected by permanent ground gas and/or volatile organic compound (VOC) contamination.

Generally, requirements will be identified from a site investigation, where the results will be interpreted, a specification produced, and a specialist installation undertaken to prevent the ingress of hazardous ground gases. Our specialist install team have the experience and expertise to efficiently carry out your installation. Working closely with local manufacturers to provide design, we can also recommend approved independent verification companies, whose integration is

key, to ensure production of verification plans at the design stage. This inclusion ensures that after installation, a safe, airtight system is installed. Our technical services include accurate surveying plans and project recommendations, utilising the latest guidance and in full compliance with current legislation and standards. Current legislation and advisory reports stipulate levels of protection required, depending on the levels of ground gas or VOC risks associated with a site. Landfill or natural gases (or their components) can typically enter buildings through gaps around service pipes, construction joints, cracks in walls and ground slabs and wall cavities.

In most buildings, measures to protect against ground gas are constructed below the ground floor level. A permanent ground gas (or VOC) protection solution consists of several individual elements, combining to form an integrated system. These can include:

- ▶ Structural barrier (floor & substructure design)
- ▶ Ventilation protection (floor slab type)
- ▶ Membranes
- ▶ Monitoring and detection
- ▶ Pathway intervention

#13 SPRAYED MEMBRANES

Beton Bauen can offer Polyurea or MMA (spray-applied) waterproofing membrane solutions, eliminating potential weaknesses often associated with other waterproofing systems. These materials have the ability to bond to virtually any surface and are able to transcend multiple substrates. A cold-process fluid spray is often quicker and safer than more traditional membrane solutions yet offer the elastic properties of modern polymers combined with waterproof characteristics of a highly amalgamated asphalt. This technology results in a seamless, waterproof membrane, that is an 'instant set' application, saving time and money. Commercial solutions often include (but are not limited to):

- ▶ Podium Decks/Terraces
- ▶ Water Storage
- ▶ Buried & Exposed Roofs
- ▶ Tunnel Linings
- ▶ Bridge Decks
- ▶ Retaining Walls
- ▶ Tank Linings
- ▶ Car Parks

#14 AERIAL SURVEYS

Our experienced and qualified pilots can provide effective survey solutions, causing minimal disruption to site operations, whilst eliminating the need for more costly forms of access. From eye level to sky level, we can provide safe and efficient solutions to challenging or restrictive environments, such as:

- ▶ High Rise Buildings & Roofs
- ▶ Water Treatment Works
- ▶ Large Scale Developments
- ▶ Off Shore Platforms
- ▶ Chimneys
- ▶ Powerplants

#15 HYDRODEMOLITION

Beton Bauen is now able to offer Hydrodemolition (sometimes known as Hydroblasting) solutions - an increasingly popular and efficient method for removing unwanted concrete, asphalt or grout on roadways, bridges and building structures.

High pressure water-blasting tools allow concrete to be removed while maintaining structure integrity, leaving a suitable bonding surface for repair material and new coating applications. This process includes a great number of benefits to the client and contractor alike.

Hydrodemolition can be extremely cost-effective compared to other methods of removing concrete. Often the project is finished in a much shorter time-frame, and require less manpower. Aside from this there are significant benefits in terms of Health & Safety (as equipment is semi-automated).

OUR SERVICES: SUMMARY OF BETON BAUEN CORE SERVICES

- #01 CONCRETE REPAIR & PROTECTION
- #02 LEAK SEALING & STRUCTURAL INJECTION
- #03 SITE SURVEYS & CONCRETE TESTING
- #04 INTRUSIVE/NON-INTRUSIVE SITE INVESTIGATIONS
- #05 CONFINED SPACE WORKS
- #06 WATERPROOFING & TANKING SYSTEMS
- #07 SPRAY APPLIED WATERPROOFING
- #08 SPECIALIST GROUTING

- #09 SPRAYED CONCRETE
- #10 INDUSTRIAL FLOORING REFURBISHMENT
- #11 FAÇADE CLEANING & PROTECTION
- #12 GROUND GAS PROTECTION
- #13 SPRAYED MEMBRANES
- #14 AERIAL SURVEYS
- #15 HYDRODEMOLITION

HEALTH & SAFETY: SETTING STANDARDS

Our aim at Beton Bauen is to set the benchmark of quality and safety for all specialist contractors in the UK construction industry. We consider health and safety measures very seriously. Our personnel are trained according with health and safety procedures and safe working practices are always met.

Beton Bauen generate risk assessment reports and method statements as a matter of 'best practice' and always comply with current site requirements and legislation. Throughout a job or project stages our primary focus is on safety measures for the entire works, in addition to any specialist materials, chemical usage and application procedures we fulfil.

Beton Bauen holds full public and employer liability insurance and comply to strict health and safety policies at all times.

BE FIT FOR WORK...

You must be mentally and physically able to work.

INTERGRATED MANAGEMENT COMBINING QUALITY, ENVIRONMENTAL AND HEALTH & SAFETY STANDARDS

Beton Bauen has invested greatly in an Integrated Management System (IMS) merging Quality, Environmental, plus Health & Safety ISO management processes into one convenient system, reducing hassle, cutting waste and refining compliance.

Clients, suppliers, and contractors can rest assured that Beton Bauen has an ISO management system with pre-defined processes and procedures in place, that is certified by a one of the United Kingdom's leading UKAS accredited certification providers.

To see copies of our ISO certificates, visit our web page WWW.BETONBAUEN.COM/CERTIFICATION

Certificate Number 18889
ISO 9001, ISO 14001,
ISO 45001

ACCREDITATION & CERTIFICATION

INDUSTRY SECTOR AFFILIATIONS & STANDARDS

Constructionline

Originally created as a government department, for over 20 years Constructionline has been supporting thousands of businesses across the public and private sectors, they work closely with various sector partners and have a deep understanding of buyers' needs. At Constructionline, the aim is to open up opportunities for members to access a wide range of procurement contracts and projects, and for buyers to access a validated pool of high-quality suppliers.

WWW.CONSTRUCTIONLINE.CO.UK

SSIP Accredited / Alcumus Safe Contractor

Safety Schemes in Procurement (SSIP) is actively committed to ensure reduction in health and safety assessment costs and bureaucracy in the supply chain, by making cross-recognition between member schemes as effective as possible. Working with many major organisations across the UK involved with new build construction and many other construction organisations as well as those in Education and Care.

Since its launch, many Clients and Principal Contractors now adopt an SSIP approach to H&S pre-qualification and will only use contractors who hold a valid and in date certificate issued by an SSIP Member Scheme. Holding a valid SSIP Member Scheme certificate means that a contractor has demonstrated their capability by meeting the SSIP 'core criteria'.

For market leading accreditation for any trade, of any size, SafeContractor is the UK's leading accreditation scheme. The SSIP and PAS91 contractor accreditation scheme checks that Beton Bauen meet the necessary requirements around health and safety, equal opportunities, diversity and environmental management practices – all in one plan. So your clients can be confident about you and reduce risk in their supply chain.

WWW.SSIP.ORG.UK
WWW.ALCUMUS.COM/EN-GB/SAFECONTRACTOR

Concrete Society

The Concrete Society is a member-based body, with no affiliation to Trade or corporate organisations and is proud to be recognised as independent. The Society has built on its technical base to become a leading provider of information serving the needs of clients, architects, engineers, specifiers, suppliers, contractors, and users of concrete, with emphasis on quality and competitiveness. The Concrete Society's independent Concrete Advisory Service provides prompt, impartial technical advice on concrete and related matters to subscribing members of any discipline.

WWW.CONCRETE.ORG.UK

Concrete Repair Association

Formed in 1989, the CRA is committed to promoting and developing the practice of concrete repair and allied disciplines, as well as advancing education, technical training, and health & safety matters in this specialist construction sector. Members include specialist contractors, product manufacturers and distributors in the field of concrete repair, plus associated organisations, such as test laboratories and consulting engineers.

WWW.CRA.ORG.UK

Health in Construction Leadership Group

The Health in Construction Leadership Group (HCLG) was formed in 2014 after a challenge from HSE's Construction Industry Advisory Committee (ConIAC) for the industry to do more to combat health issues within the sector. The group is comprised of contractors, clients, the Health and Safety Executive, professional bodies, trade associations and trade unions. The role of the HCLG is to act as both a stimulus and a catalyst in helping unify the industry in its approach to worker health protection and the promotion, adoption and implementation of best practice processes and initiatives.
